WE PROMISE to deliver absolute peace of mind because every home matters.

THE CULMINATION OF OVER 120 YEARS OF INNOVATION.

Continuing the longstanding tradition of innovation established by our parent company, Andersen Windows, Renewal by Andersen has reinvented the replacement window business in

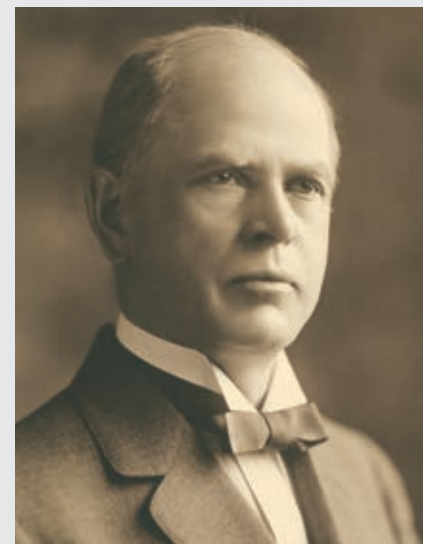

less than a generation. Now we're doing it again, with a line of beautiful entry doors that deliver superior performance – doors designed to last and protect your home.

Hans Andersen would surely be proud we're building superior entry doors, but not surprised.

OVER
120
YEARS
OF
Innovation
AND
Excellence

Since Hans Andersen founded Andersen Windows in 1903, the company has led the way in quality and innovation, growing and evolving to become an industry leader. First with window frames, followed by the world's first preassembled windows, and later with the launch of Renewal by Andersen in 1995.

Leave it to the Masters.

Who better to trust with the installation of your new Ensemble™ entry doors than the dedicated replacement division of the company who designed and built them.

Because we work with the best people across the board, we're able to redefine and push industry installation standards to new heights, bringing years of experience to the job that you won't find anywhere else. Certified Master Installers are unique to Renewal by Andersen, rigorously trained to treat your home respectfully and your entry doors expertly. Once they get to work, you'll see why we're proud to call them Certified Master Installers.

A warranty that works for you.

Renewal by Andersen stands behind our products and their installation. We offer one of the strongest limited warranties of any entry door manufacturer, and it is fully and automatically transferable, adding resale value to your home.

Partial Light Door, Sidelights, and Transom with St. Croix Art Glass

Oval Light Door and Sidelights with Waconia Glass

EVERYTHING YOU WANT IN AN ENTRY DOOR.

Partial Light Door, Sidelights, and Transom with Minnetonka Glass

St. Croix Art Glass

Stylish and elegant, Ensemble™ entry doors are carefully crafted so all components work together seamlessly as a system. The panel, frame, hardware, sidelights and transom are precisely designed to fit perfectly and perform smoothly as one. You can expect easy and reliable operation the first time and every time you use your new door.

These doors feature lasting beauty and are sure to stand out and get noticed by the entire neighborhood. With 38 stunning panel styles and endless ways to customize, it's easy to create a unique door all your own.

Ensemble entry doors also help make your home safer and more secure.

They provide extra protection against forced entry, which can give you and your family peace of mind.

What's more, Renewal by Andersen has engineered Ensemble entry doors to deliver superior performance. They're designed to stand up to extreme weather, help make your home more comfortable and reduce energy costs – all while providing years of trouble-free operation.

It doesn't make sense to settle for anything less. Upgrade your home with Ensemble entry doors, and enjoy all the advantages, every day!

“We absolutely love our new Renewal by Andersen Ensemble entry door! No other update has added such beauty and value to our home.”

– Scott and Kris D, Ohio

Bringing a higher level of security and safety to your home.

In addition to their unrivaled beauty and performance, Ensemble™ entry doors are strong and secure. The dual-composite frames, reinforced panels and hardware systems are engineered to deliver industry recognized forced-entry resistance¹ and some of the highest security grades achievable.² Few other doors can provide this peace of mind.

SECURITY YOU CAN SEE AND HEAR.

When you close the door, the multi-point latching system engages the frame securely with a reassuring “THUNK!” A solid-wood lock block supports and protects the stainless-steel lock cartridge and built-in deadbolt. The multipoint latch contains integral triggered-overthrow latch bolts that deeply engage the frame for added panel retention.

All precisely working together to provide top-notch residential entry door security.

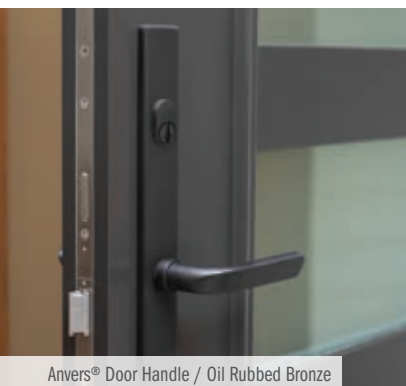

Multi-Point
Mortise
Locking System

Stainless Steel Multi-Point Mortise Locking System

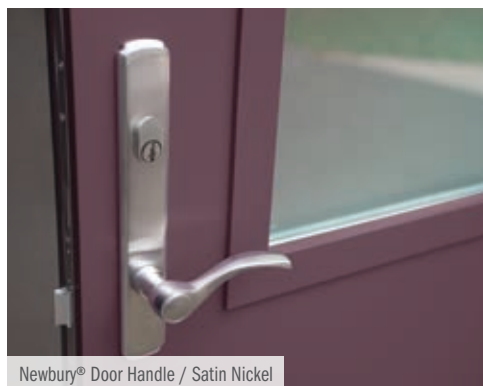

Latches the door in three places, for a secure, weather-resistant entry.

Newbury® Door Handle / Satin Nickel

Anvers® Door Handle / Oil Rubbed Bronze

Newbury® Door Handle / Satin Nickel

¹When independently tested per AAMA 1304-18: Voluntary Specification for Determining Forced Entry Resistance of Side-Hinged Door Systems, all configurations with a deadbolt achieve a pass rating. ²When independently tested per ASTM F476: Standard Test Method for Security of Swinging Door Assemblies, cylinder body load test achieves Grade 30 with all other referenced tests achieving Grade 40 when configured with a mortise locking assembly.

¾ Light 1-Panel Door with Sidelights

Full Light Door with Fully Divided Light Grilles

Reinforced fiberglass panel
adds strength and provides robust support for hinges and lock assemblies.

Enhanced Security
Forced-entry tested to help deter break-ins.¹

**CUSTOM BUILT TO
PROVIDE TOP-NOTCH**

PERFORMANCE.

Better entry doors – by every measure.

To develop superior entry doors, **we precisely engineered everything to work together as a system** – the panel, frame, hardware, sidelight and transom. Whether you're looking for protection from the elements, durability or proven performance, you'll find our beautiful doors deliver all that and much more!

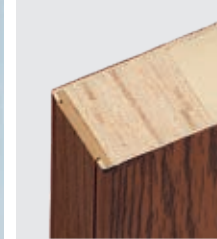

Partial Light Door / Black Exterior

Six-Panel Door / White Exterior

Reinforced Composite Panel

Scratch-resistant fiberglass composite door panels are reinforced with a Laminated Veneered Lumber (LVL) skeleton for enhanced strength and stability, and won't rust, rot or dent.* All panels feature full-perimeter composite edges that protect against water and insect damage.

Durable and supple weatherstrip seals snugly and stays in place. A unique shield protects it from UV rays, ensuring long life.

Insulated with CFC-free foam that keeps heat and cold out.

Reliability you can count on.

Doors shouldn't be difficult to open and close. But, as we all know, many are. That's why **Renewal by Andersen designed our Ensemble™ entry doors to open and close easily, then tested and retested them to ensure they deliver reliable performance.**

DESIGNED TO LAST AND LAST.¹

From the frame to the door sill, every part of an Ensemble entry door is built to provide you with lasting beauty and dependability. **Our exclusive Fibrex® material plus fiberglass dual-composite door frame is incredibly durable and will never rot¹.** The tough, scratch-resistant door panel is made of reinforced fiberglass. And the door sill? It's just as durable, constructed of aluminum bonded to an impact-resistant Fibrex composite material threshold that can withstand years of kids trekking in and out of the house.

You can be confident our Ensemble entry doors will help keep your home more comfortable and can reduce your energy bills.

Easy, trouble-free operation

Tested to provide years of reliable performance.

¹Visit renewalbyandersen.com for warranty details.

To reinvent the entry door, we had to completely reimagine the frame.

Ensemble™ doors feature a unique, full-width door frame system, which is custom built to fit the rough opening perfectly and seamlessly accommodate additional components, such as sidelights.

ONE CONTINUOUS COMPOSITE FRAME FITS ALL. PERFECTLY.

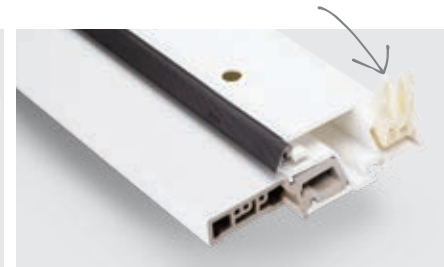

Our frame system fuses an interior Fibrex® material composite with a fiberglass exterior. These materials are covered by proprietary Perma-shield protective coatings, then structurally bonded together. **The resulting exclusive frame is stable in all climates and very low maintenance.**

No leaks or rot.

We fill the bottoms of all frames with a rot-resistant urethane, mill them perfectly flat, then attach each side to the door sill to form a watertight seal. Similarly, we precisely align the joints at the top of the frame, fill them with a urethane composite, and seal them tightly together, forming a strong, waterproof bond. **The result is a square, durable and beautiful frame system that withstands the elements – and the test of time.**

Urethane-filled end
Rot resistant, watertight.

Tight, precise top corners
Secured with corner keys and fasteners.

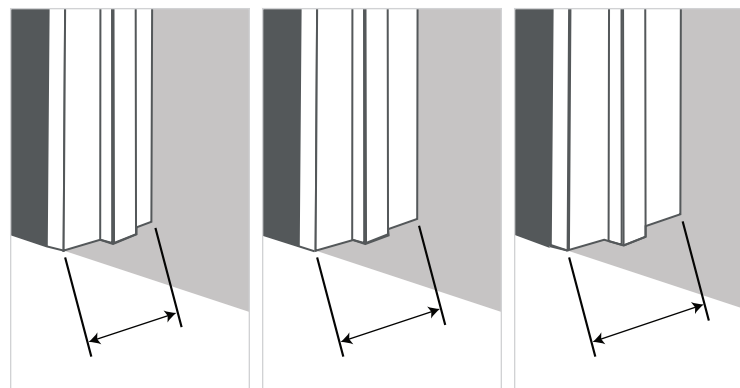

Contain-and-drain door sill

A patented door sill design channels water away from the door. Water passes through the sill and drains from weep holes along the bottom exterior of the sill. A small covering keeps bugs out of the sill.

Keeps heat and cold out, too

An anodized aluminum sill bonded to a durable, impact-resistant Fibrex composite threshold thermally separates the inside from the outside. This helps deliver robust energy performance and can withstand years of heavy use.

Jamb depths for all openings

Renewal by Andersen experts will determine the proper jamb depth for your door frame, which we'll custom build to fit perfectly into your home.

A weathertight seal, every time

A urethane foam weather strip anchored by a patented stainless steel clip keeps the weather strip firmly in place in all conditions. This weather strip is guarded by a UV shield that protects it from the sun's damaging rays, ensuring years of reliable performance.

Specialty Light Door and Transom with Satin Etched Patterned Glass

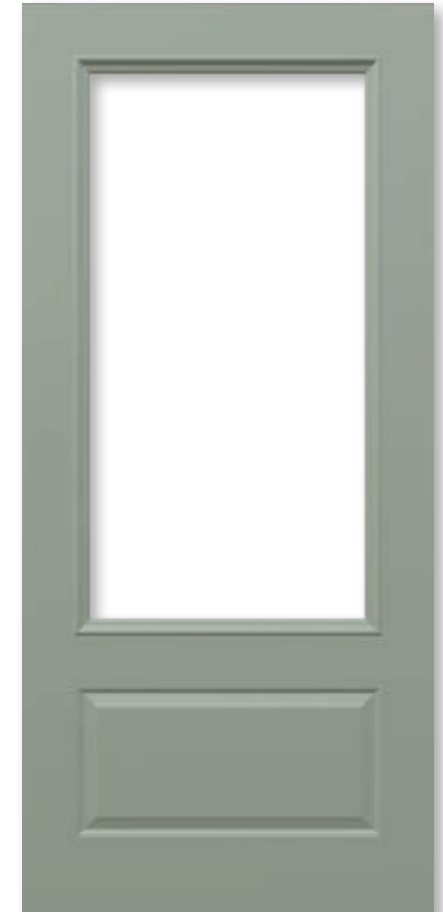

Five fashionable families and 38 stunning styles.

The Ensemble™ entry doors program includes five distinct panel families and dozens of styles for all types of homes. From contemporary to traditional, craftsman to mid-century modern and more, we've got the look you want. And we offer a wide range of colors, textures, grilles and glass, so it's easy to design a beautiful door that fits your home and personal style, perfectly.

Solid panel family

Clean, classic design without any glass for maximum privacy. Features attractive, high-definition panels or flush options.

Full and partial light family

Built-in glass of varying sizes allows ample light into the home. The glass spans at least half the length and/or width of the panel. May also feature architectural embossments.

Oval light family

These elegant doors showcase large, oval-shaped glass that maximizes the light in your home.

Craftsman light family

Attractive designs that balance your needs for light and privacy. Features arched, half-circle or rectangular glass at top and distinctive, high-definition panels below.

Specialty light family

One to seven smaller square or rectangular glass lights positioned throughout the door panel to distribute light evenly.

DOOR CONFIGURATIONS TO

Thanks to their continuous frame system, Ensemble™ entry doors can accommodate just about any architectural detail. All entry components fit into the frame seamlessly, regardless of size. This innovative design provides a strong and flexible foundation for a beautiful and better performing entry door system.

Right-hand, left-hand and special options.

No matter which way your current entry door opens, we've got you covered. Add one sidelight or dual sidelights to achieve your desired look. We also offer double doors with single-or dual-active panels.

Single Door

One door mounted in a frame that can be left- or right-handed to open inward in the direction you desire.

Single Door with Sidelight

Features a door and single sidelight separated by an integral mullion. The door may be hinged on either the jamb or integral mullion.

Single Door with Direct-Set Sidelight

One hinged door and a full height piece of glass separated by an integral mullion. You can choose to hinge the door on either the jamb or integral mullion.

Single Door with Dual Panel-Set Sidelights

Features a door centered between two sidelight panels. Integral mullions separate the sidelight panels from the door, which may only be hinged on either of the mullions.

FIT EVERY STYLE OF HOME.

Single Door with Dual Direct-Set Sidelights

One door centered between two full-height pieces of glass. Integral mullions separate the sidelight panels from the door, which may only be hinged on either of the mullions.

Double Door, Single Active

Two doors in a single frame separated by an integral mullion. One door is operable, and the other is a non-hinged/non-operable door. The operable door may be hinged on either the jamb or integral mullion.

Double Door, Dual Active

Two doors side by side, both of which are hinged and operable. The first door to open is active, the second passive. The doors are separated by an astragal mounted to the passive panel, and may only be hinged on the jambs.

Transoms to complete your perfect door.

Two transom options are available to complement your beautiful new entry door. The first is a rectangular transom with select art glass options available. The second transom option allows you to integrate your choice of 11 non-rectangular windows directly above your new door.

Many attractive trim options

With a range of Fibrex material trim options identical to our window trim selection, it's easy to match your new entry door to your Renewal by Andersen windows or complement your existing home detail.

The finishes – and finishing touches – that tie it all together.

Renewal by Andersen offers an extensive selection of hardware, so it's easy to equip and accessorize your Ensemble™ entry doors exactly the way you want.

Mortise hardware, including a multipoint locking system, matching hinges and more. Plus, options to integrate with smart hardware and apps for greater convenience and security.

Hinges – Adjustable, ball-bearing hinges are standard on all doors. Many attractive finishes are available to match or complement your hardware selection.

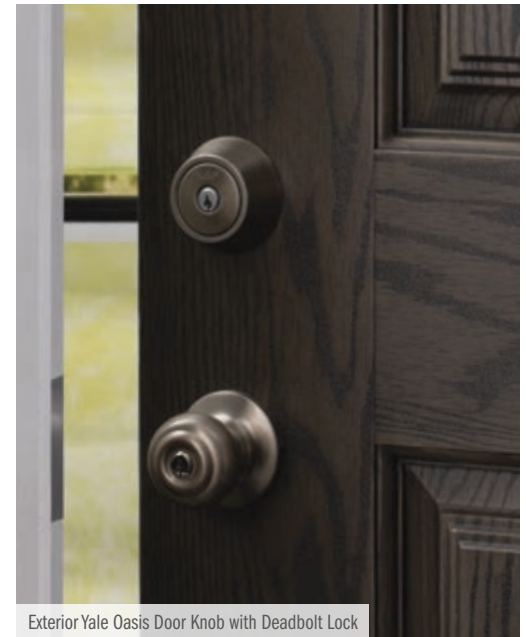

Cross-bore hardware – Many traditional lever, knob or handleset options, plus deadbolts to match.

Newbury® Door Handle with Mortise Lock

Interior Yale Oasis Door Knob with Deadbolt Lock

Exterior Yale Oasis Door Knob with Deadbolt Lock

Strikeplates – Built to withstand years of heavy use and available in a range of popular finishes.

An array of door accessories.

Peep sights, knockers, mail slots, kick plates and more. Everything you need to get the look and functionality you want – inside and out.

Kick Plate, Oil Rubbed Bronze Finish

Mailslot, Satin Nickel Finish

Square Clavos, Black Finish

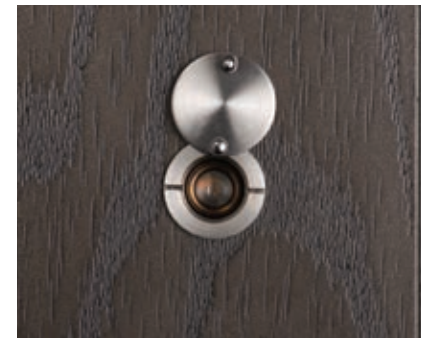

Peep Sight, Exterior,
Satin Nickel Finish

Door Knocker, Oil Rubbed Bronze Finish

Dentil Shelf, Mahogany Panel Texture

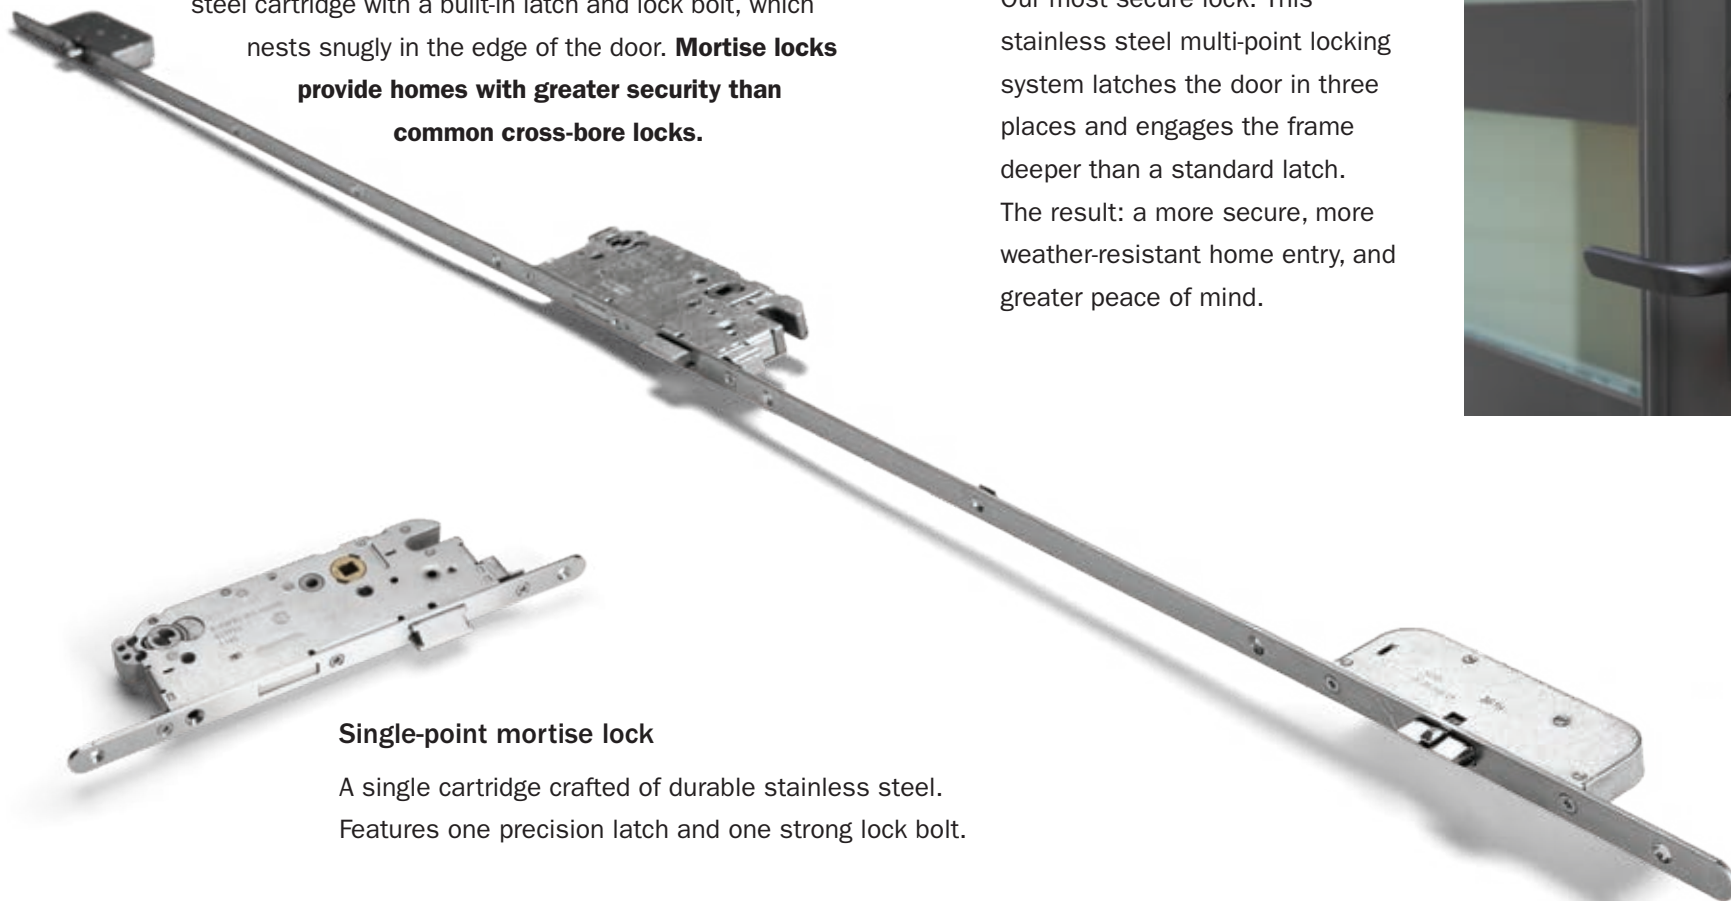

Peep Sight, Interior, Satin Nickel Finish

Stronger and more secure.

Mortise locks

Mortise locks are renowned for their durability and security. They were developed by European craftsmen and are widely used there today. In the US, they're the lock of choice in commercial settings and are rapidly gaining popularity with homeowners.

Renewal by Andersen offers robust, German-engineered mortise locks for our Ensemble™ entry door systems. All feature a stainless steel cartridge with a built-in latch and lock bolt, which nests snugly in the edge of the door. **Mortise locks provide homes with greater security than common cross-bore locks.**

Single-point mortise lock

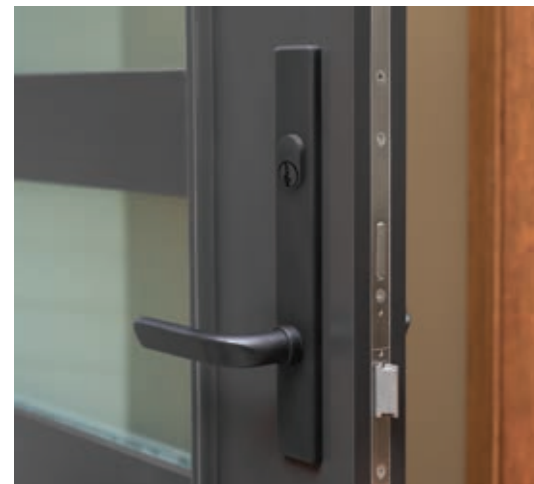

A single cartridge crafted of durable stainless steel. Features one precision latch and one strong lock bolt.

Mortise door levers and locks

With Ensemble entry doors, you can choose from numerous door lever styles designed to work with your mortise lock selection, including a keyless lock featuring smart home integration. In addition, there are a wide range of color options, so it's easy to get the look to fit your style.

Multi-point locking system

Our most secure lock. This stainless steel multi-point locking system latches the door in three places and engages the frame deeper than a standard latch. The result: a more secure, more weather-resistant home entry, and greater peace of mind.

² Features special coating to seal the finish, providing tarnish and corrosion protection. ³ Features "living" finish, where the patina changes with time and use.

Functional and popular.

Cross-bore locks

Cross-bore, or cylindrical, locks are found in most US homes. They're easy to use, affordably priced and feature a single locking latch and optional deadbolt. The hardware operates through two cross-bored holes in the door panel:

- 1) The large hole drilled through the face of the panel to accept the handle mechanism.
- 2) The latch bore hole, drilled from the side of the door into the larger hole to allow the latch and deadbolts to engage the handle mechanism.

Single cross bore

Features only the door handle or knob and connects to a latch bolt that may or may not lock.

Double cross bore

Has two cross-bore fabrications. The first contains a door handle or knob that connects to a latch, while the second is for the deadbolt lock.

Huge selection of handles and locks

For Ensemble™ entry doors with cross-bore configurations, Renewal by Andersen offers a vast array of high-quality door handles and locks from Yale®. Choose from knobs, levers and handlesets in styles and finishes from contemporary to traditional. Smart locks, keyless touchscreen locks or dual key lock and keypad options are available for those who want greater convenience and flexibility.

Grilles help define your door.

Renewal by Andersen offers a number of attractive grille styles and patterns for select door panels featuring rectangular or square glass lights. Our grilles add definition and personality to your door, and make it easy to match your home's style or create a whole new look.

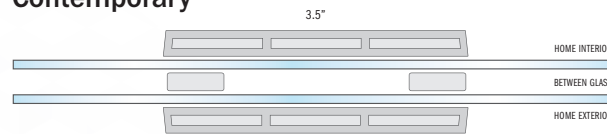

Fully Divided Light Grilles (FDL)

These grilles provide the classic look of a true divided light window. The high-definition FDL grilles are Fibrex® material and are available in four different widths. Between the glass panes, an aluminum spacer stands slightly away from each pane to maintain thermal performance.

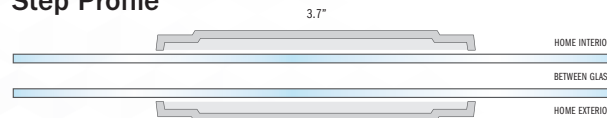

Chamfer A

Contemporary

Step Profile

Select panels are available with a low-profile step grille bar constructed from fiberglass material. These grilles are limited in their patterns and do not contain any aluminum FDL spacers between the glass.

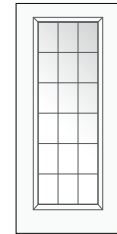

Grilles Between Glass Grilles (GBG)

Sculpted aluminum grilles placed between the two panes of glass. Two widths are available. All options feature an enamel finish that will match or complement the panel or frame color.

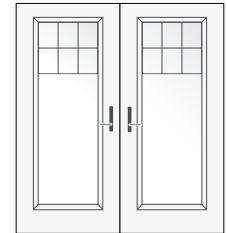

Colonial

Rectangular equal light pattern. Grille light size varies depending on size of glass light and the desired number of lights.

Modified Colonial

Incorporating the top horizontal rows of a standard Colonial pattern. The bottom grille bar can be configured with a wider 2 1/4 inch bar if desired.

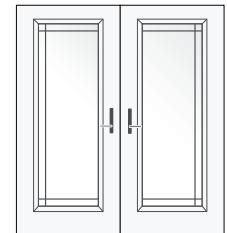

Prairie

Two vertical grille bars and two horizontal grille bars each center-of-bar located 4 inches from the edge of the visible glass.

Modified Prairie

Prairie grille patterns that only have vertical bars on the outermost edges of the glass combination.

Lovely Colors that last.

At Renewal by Andersen, we take great pride in building entry doors that look better, last longer⁴ and stand up to extreme weather. Our secret? We use proven exterior coating technologies that provide exceptional protection. With 20 attractive and durable shades from subtle to bold, and seven prefinished stained options, it's easy to find a favorite.

You can also choose your own stain

Prefer to stain or paint your door to match your current décor? Some panel styles are available unfinished. Ask your Renewal by Andersen representative for details.

Glass that sets the tone and reflects your style.

Whatever you're envisioning for your entry, from elegant to modern to functional, Renewal by Andersen has an array of popular glass designs to help you pull it off. All designed to pair beautifully with your preferred door panel, sidelights and transom.

Enhanced Comfort

At Renewal by Andersen, we'll help you sort through the details of glass heating and cooling performance, visible light transmittance, and ultraviolet (uv) protection to pinpoint the right entry door glass for you. Our doors take advantage of the newest technologies to help lower energy costs and keep your family comfortable.

Enhanced Triple Pane Glass

An extra pane of glass and selectively applied Low-Emissivity glass coatings makes these glass options our most energy efficient for all climates.

Enhanced Triple Pane

An extra pane of glass coupled with our high-performance Low-E4 coating helps keep

more heat in and cold out, making this our most energy-efficient glass option best suited for colder climates.

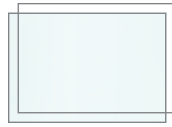

Enhanced Triple Pane with SmartSun™ Glass

An extra pane of glass coupled with our high-performance Low-E4*

SmartSun™ coatings helps keep more heat out while maintaining cool comfort inside, making this our most energy-efficient glass option best suited for hot climates.

High-Performance Dual Pane Glass

Dual pane glass construction with selectively applied Low-Emissivity coatings provide wide range of glass options with varying levels of performance and clarity.

Low-E4® SmartSun™ Glass

SmartSun glass meets our highest standards in cool and hot weather performance.

SmartSun glass blocks 95% of harsh UV rays that can damage artwork, and furniture.

Low-E4® Glass

Perfect where both heating and cooling costs are a concern, our Low-E4 glass helps keeps

your home warmer in winter, cooler in summer, and blocks 84% of harmful UV rays.

Low-E4® SmartSun™ Glass with HeatLock® Technology

All of the benefits of our Low-E4 SmartSun glass plus

an energy-saving glass coating that helps your living space feel warmer.

Low-E4® Sun Glass

For hot, dry climates, our Low-E4 Sun Glass utilizes a subtle tint to help block out

heat from the sun, reducing cooling costs.

Dual Pane Glass

Two panes of glass for comfort and energy efficiency. A clear, uncoated surface gives this glass a natural look and allows bright light indoors.

Art Glass

Looking to add flair to your home and make a beautiful first impression? Art glass is all about that. It's elegant, decorative and guaranteed to wow! Choose from seven distinct families and beautifully crafted styles from classic to contemporary. Art glass is very energy efficient, and options are available for select doors, sidelights and transoms.
